

June 30, 2017

Los Osos Community Advisory Council

Subject: 2017 Five Year Pavement Project Update

Attached to this memorandum are the updated five-year list of roads to receive asphalt overlay or pavement surface treatment (such as a chip seal, slurry seal or micro surface). The new Five-Year Asphalt Overlay and Surface Treatment lists are based on an annual \$10 million program which is anticipated from funding under the recent passage of Senate Bill 1 (SB1). SB1 is intended to provide funding for local road maintenance under a "Fix it first" approach to transportation and will take effect November 1, 2017. Revenues from additional gas tax, vehicle registration fees and fees on zero emission vehicles will be phased in over the next three fiscal years and will ultimately provide at least \$9 million in new revenue.

Revenue generated from SB 1 will increase the amount of road miles paved each year from 5 miles to an average of 14 miles while maintaining the surface treated roads at approximately 60 miles per year. This will allow us to work on seven percent of our paved road system each year. The Pavement Condition Index (PCI) of the road system, measured on a 0-100 scale, was in decline prior to 2012, but since then, the system has improved by using a variety of preventative maintenance treatments. The average road system PCI, as of the end of the FY 2016-17, is 66. This is slightly higher than the State average of 65 and above our FY 2016-17 budget goal of 64. The PCI in 84 is Los Osos. It is anticipated that the revenue provided by SB 1 will not only provide funding to maintain the PCI at its current level but will even improve the condition of the system upon completion of the overlay and surface treatment projects over the next five years.

The new Five-Year Asphalt Overlay and Surface Treatment lists were developed based on a 2016 evaluation of the entire 1,092 mile paved road network. Each road was evaluated and given a PCI ranking. These rankings help categorize it within the four-tier system to identify which pavement treatment will best prolong the life of the pavement. Higher PCI's will receive a surface treatment while lower PCI's will necessitate a new asphalt overlay.

The complete pavement management plan is available at:

http://www.slocounty.ca.gov/PW/Traffic/Road_Pavement_Condition_Report.htm

Please review the lists and if you have any questions please contact at me (805) 781-4476 or dspagnolo@co.slo.ca.us. I am also available to make a presentation to review the report at your advisory council meeting.

Sincerely,

DON SPAGNOLO, P. E.
Transportation Programs Manager
