Hi Kerry, thanks for hanging in tonight and answering all the questions. We all appreciated it.

So for the record, LOCAC approved recommendation of 2 projects: DRC2020-00150 Davis and DRC2020-00201 Goodwin.

As for the Morro Shores Mobile Home Park Expansion, the LOCAC motion was: LOCAC has recommended approval for the Morro Shores Mobile Home Park expansion project of 10 new prefabricated manufactured homes with the condition that a 2:1 water offset be required, and it is suggested that Morro Shores should use their own residences to provide this 2:1 water offset.

Below is the list of comments received from the 2 previous Land Use Committee meetings and tonight's LOCAC meeting. Please take them seriously, concern for our aquifer continues to grow because of the drought. I realize this is not the best time to say that with all the rain we are getting this week, but as you know, one storm does not change things.
